## 1. Core Philosophy

SocialCircle.P2P is a **P2P social forum platform** where every user's profile IS their own forum. It fuses three nostalgic aesthetics:

- **XMB Forums (2006)**: Hierarchical groupings → topics → threads, table-based layouts, sharp edges, rank systems
- **MySpace**: Full creative freedom — custom backgrounds, animated signatures, HTML/CSS profile editing
- **Microsoft FrontPage**: Drag-and-drop WYSIWYG builder with raw code toggle

With a **solarpunk** visual identity: lush greens, warm amber sunlight, bioluminescent accents, organic growth metaphors.

### Key Principles:

- No central servers — users ARE the network
  - Every profile is a forum — the user is Super Admin
  - Privacy by design — encryption is visible and celebrated
  - Organic propagation — not viral addiction
  - Karma is reputation, not currency
  - Extractive behavior gets friction, not rewards
- 

## 2. Protocol & Architecture

### Platform

- **PWA** (Progressive Web App) — installable on any device
- Single codebase: React + TypeScript + Vite + Tailwind CSS
- WebRTC for peer connections (Phase 2)
- IndexedDB for local storage
- No backend server required for core function

### Data Model

```
User
├─ Public Profile (forum face)
├─ Content Profile (creator face)
├─ Anonymous Profile (nickname face)
├─
├─ Forum (their profile IS a forum)
├─   └─ Groupings (max 5)
├─     └─ Topics (max 25 total)
├─       └─ Threads
├─         └─ Posts (with signatures)
├─     └─ Lounges (max 10, invite-only)
├─
├─ Vblog (video blog)
├─ Store (P2P marketplace)
```

- └─ Karma 4-Vector (M-S-I-E reputation)
- └─ Compensation (spendable labor credits)
- └─ Credibility (per-context trust score)

## P2P Chunk Distribution

1. User creates profile → local backup on device
2. Data chunked and distributed to friends
3. Friends redistribute to THEIR friends
4. Offline = retrievable from the mesh
5. Popular content has MORE backup copies
6. Lighthouse: GPS-based local peer discovery for first connection

---

## 3. IVS Framework Integration

Per the uploaded protocol specification:

### Karma 4-Vector (Reputation, NOT Currency)

- **Material (M)**: Tangible contribution — hosting, bandwidth, storage
- **Social (S)**: Community connection — engagement, friendship, events
- **Innovation (I)**: Creative contribution — content, widgets, code, design
- **Ecology (E)**: Network health — seeding, uptime, helping others backup

#### Rules:

- Dimensions are INCOMMENSURABLE — never sum them into a scalar
- Karma is REPUTATION — non-transferable, per-user, peer-validated
- Karma accrues through CONTRIBUTION, not purchase

### Dimensional Compensation (Spendable Layer)

- Earned through SPECIFIC LABOR (storage hours, bandwidth, curation)
- Used for: tips to creators, system privileges, store purchases
- Subject to DEMURRAGE (~90 day decay) — prevents hoarding
- Separate from Karma — spending compensation doesn't reduce reputation

### Directed Entropy Thesis

- Extractive behavior (high Social karma, low everything else) gets FRICTION
- S-only accumulation degrades chunk service priority
- “⚠️ Dimensional imbalance detected” warning shown

### RSV (Recursive Signal Verification)

- All verification happens through recursive peer signals
- No central authority for trust
- Peer endorsements weighted by endorser's credibility

## 4. Visual Design System

### Color Palette (Solarpunk)

| Token          | Hex     | Usage                      |
|----------------|---------|----------------------------|
| --sp-canopy    | #0f291e | Darkest green, backgrounds |
| --sp-deep      | #1b4332 | Deep green, secondary bg   |
| --sp-moss      | #2d6a4f | Primary green, borders     |
| --sp-fern      | #40916c | Medium green, links        |
| --sp-sapling   | #52b788 | Light green, highlights    |
| --sp-mint      | #74c69d | Mint, hover states         |
| --sp-parchment | #95d5b2 | Lightest green, muted text |
| --sp-amber     | #d4a017 | Gold/amber, CTAs, accents  |
| --sp-cream     | #f5f0e1 | Cream, primary text        |

### Typography

| Font           | Role                                                |
|----------------|-----------------------------------------------------|
| VT323          | Headers, labels, category titles, retro UI elements |
| Space Grotesk  | Large headings, banner titles                       |
| Inter          | Body text, readable content                         |
| JetBrains Mono | Data, timestamps, code, tiny links, stats           |

### Design Rules (2006 Forum Aesthetic)

| Rule                         | Value                                          |
|------------------------------|------------------------------------------------|
| Border radius (containers)   | 0px everywhere                                 |
| Border radius (avatars only) | 2px (slightly rounded squares)                 |
| Borders                      | 1px solid, --sp-moss at 20-40%                 |
| Shadows                      | NONE —completely flat                          |
| Buttons                      | Square corners, 1px border, solid bg           |
| Cards                        | NOT cards —boxes with 1px borders              |
| Hover                        | Background color shift ONLY —no lift, no scale |
| Spacing                      | Tight —4px, 8px, 12px (not modern 24px)        |

### Themes

- **Dark Mode:** “Bioluminescent Forest” — deep emerald, glowing cyan accents
- **Light Mode:** “Solar Meadow” — warm cream, golden amber, sage green

## 5. Navigation & Routes

| Route     | Page            | Description                                                   |
|-----------|-----------------|---------------------------------------------------------------|
| /         | Landing         | Solarpunk hero, encryption manifesto, chunk network animation |
| /:handle  | Forum Profile   | Forum home —groupings, topics, threads, talk box              |
| /@:handle | User Profile    | Detailed profile —About, Posts, Vblog, Store, Contact, Links  |
| /feed     | Pulse Feed      | Pulsing threads + hashtag filtering                           |
| /explore  | Discovery       | Search, tags, random profiles, lighthouse map                 |
| /talk     | Messenger       | Encrypted DMs, group chat, self-destruct                      |
| /build    | Profile Builder | WYSIWYG + code editor, theme designer, HTML reference         |
| /store    | P2P Marketplace | Browse products, income-based service charges                 |
| /settings | Control Center  | Profile faces, encryption, chunks, privacy, network           |

**Navbar:** Forum | Explore | Talk | Store | Build | Settings

- 32px height, solid --sp-canopy, no blur, 1px bottom border
- VT323 14px links, amber 2px underline for active
- Right: peer count (10px mono) + 24px square avatar + “My Forum”
- Compensation wallet: Comp: 1.2K | 890M 1,2475 340I 45,200E

## 6. Landing Page (/)

**Sections (Top to Bottom):**

1. **Hero Canopy** — Full-screen forest canopy image, “No servers. Only seeds.” headline, CTAs
2. **Chunk Network Visualization** — Interactive SVG showing P2P mesh (center node, friend nodes, connection lines, seed particles)
3. **Builder Teaser** — FrontPage-style builder preview with widget mockups
4. **Three Faces** — Cards showing Public Profile, Content Profile, Anonymous Profile
5. **Encryption Manifesto** — “Trust, but verify” with matrix rain background
6. **Community CTA** — Stats (12,847 nodes, 4.2M seeds, ∞ freedom, 0 servers) + testimonials

## 7. Forum Profile (/:handle)

**Layout:** 3-Column Forum (max-width 1200px)

**Forum Banner (~220px)**

- **Left:** 150px square avatar (2px radius) with amber border + green glow
  - Status line, online dot, handle in JetBrains Mono
- **Right:** "{Name}'s Forum" in Space Grotesk 42px
  - Stats: Threads | Posts | Seeds | Joined date (11px mono)
  - **Bottom-right corner:** U2U Messages | Edit Profile | Admin CP (10px grey text links)
- Background: --sp-canopy with tiled retro texture

## Talk Box (Shoutbox)

- Collapsible, 1px border, 0px radius
- “ Talk Box” VT323 header + “Viewable by all | Posting restricted” badge
- Shout rows: [avatar] Name » message [timestamp]
- Input at bottom (if permission allowed)

## Vblog Section

- “ VBLOG” header in VT323 14px uppercase, amber left border
- 4-column grid of video cards (2-col mobile)
- Each: 16/9 thumbnail with play overlay, duration badge, title, views + age
- 4 mock videos: Garden Tour (16:34), P2P Explained (08:12), Solar Beats (04:56), Day in Life (22:01)

## Groupings → Topics (Expandable)

- 5 mock groupings: Important Notices, General Discussion, My Groups, Topics of Interest, Blogs/Videos/Wall
- Each grouping: VT323 14px uppercase header, 4px amber left border, topic count badge
- Topic rows: icon (//) + title + thread count + views + last activity + last thread preview
- Click topic → thread list view

## Thread List View

- Breadcrumb: Forum > Grouping > Topic
- Action bar: [New Thread +] [Subscribe] [ Sticky] [ Lock]
- Thread rows: icon + title + author + replies + audience badge + pulse score + reactions
- Audience badges:  Public |  Friends |  Greater Circle |  Circle |  Anonymous
- Pagination: [1] [2] [3] [Next] square buttons

## Thread Post View

- **Left column (160px):** 80×80 square avatar, BBCode-rendered username, rank badge, post count, seed count, quality stars (, density bar ( 85%), 4-vector karma mini badges, credibility shield ( 95)
- **Right column:** Post # + timestamp + Quote/Report links, BBCode-rendered content, 4 reaction buttons ( M  S  I  E), signature separator, animated signature
- **Reply Box:** BBCode textarea with Preview toggle + hint bar

## Left Sidebar (180px)

- “ ONLINE” header with count badge
- Friends grouped:  Online Now /  Recently Active /  Offline
- 20px square avatars

## Right Sidebar (200px)

- “ RANKED USERS” header
- Users listed by rank with custom rank name badges
- “Manage Ranks” button (owner only)

- Credibility summary

### Groups Widget

- “👥 GROUPS” header with Create + and Search
- Your Groups + Discover sections
- Mock: Gardeners Guild (23), Solar Beats (18), Code Forest (31), Digital Artists (47), The Council (12, invite-only)

### Lounges Section

- “🌙 INVISIBLE LOUNGES” purple border
- Owner-only, hidden member counts, password protected

### Floating FAB

- Amber circle (56px) with “+”
- Menu: New Topic, Start Group, Create Lounge, Shout, Share Video, Blog Post

## 8. User Profile (/@:handle)

### Layout: Banner + Tabbed Interface

#### Banner

- 200px height with custom background
- 150px square avatar + name + @handle + rank badge + bio

#### Tabs (sharp tab bar, amber top-border active): About Tab:

- Bio text
- Profile fields with privacy indicators: 🎂 Birthday, 💕 Relationship, ✉ Email, 📍 Location, 📞 Phone
- Privacy: F=Friends, C=Circle, P=Public, A=Anonymous
- 4-Vector Karma bars (reputation, NOT spendable)
- Credibility score: 🛡 95 (Verified)
- Action buttons: [Add Friend] [Message] [View Forum] [Report]

#### Posts Tab: Recent posts/threads table

#### Vblog Tab: 4-video grid with play overlays

#### Store Tab:

- Personal products: Organic Seeds (\$15E), Custom Art (\$45E), P2P Kit (\$120M)
- Service charge info per tier

#### Contact Tab: Privacy-filtered contact methods

#### Links Tab: Affiliated links — Website, Portfolio, GitHub, Bandcamp

## 9. Pulse Feed (/feed)

Layout: Single Column (max-width 680px)

### Tag Filter Bar

- Horizontal pills: [All] [#p2p] [#tech] [#solarpunk] [#music] [#art] [#intro] [#market] [#design] [#garden] [#crypto]
- Click to toggle (AND logic), amber bg when selected
- “Clear All” button

### Pulsing Threads (Exactly 5 — no infinite scroll)

- Pulse score: 0-50 grey, 51-100 amber, 100+ amber+glow
- Pulse path shows propagation chain
- 5 mock threads with scores 89, 67, 45, 34, 21

### Pulse Legend

“⚡ = Pulse Score (hops × interactions). No AI. No algorithm. Just organic propagation + your tag choices.”

### Store Link

- “🛒 Visit the P2P Store → /store”

---

## 10. Discovery (/explore)

- **Search bar** with live preview
- **Tag cloud** with NSFW blur toggle
- **Random profile shuffle** with 3D flip card
- **Lighthouse map** — concentric pulse rings, peer dots, GPS beacon
- **Creator grid** — profile cards with hover effects

---

## 11. Encrypted Messenger (/talk)

- **Conversation list** with E2E lock badges, encryption status
  - **Chat view**: moss-green sent / bark-brown received bubbles
  - **Matrix rain** background at 5% opacity behind E2E messages
  - **Self-destruct**: Orange countdown → text scramble → dissolve animation
  - **Key fingerprint drawer**: Terminal-green fingerprint, QR code, verify trust
  - **Composer**: Auto-expanding textarea, encryption toggle, self-destruct timer
  - **Empty state**: “No servers. Only seeds.” with encryption shield
-

## 12. Profile Builder (/build)

**Layout: 3-Panel**

**Top Toolbar**

- Undo | Redo | Preview | Save
- Layout: Classic | Grid | Wide | Chaos
- Usage: Groups [     ] 2/5 | Topics [     ] 3/25 | Lounges [     ] 1/10
-  Reference toggle |  Theme Designer button

**Left Panel: Toolbox (260px)** **Structure:** Grouping + | Topic + | Lounge + | Signature | Rank Editor **Content:** About Me, Photo Album, Video Feed, Blog, Wall, Groups, Friends, etc. **Utility:** Music, Custom HTML, Ad Block, Status, Forum Stats **Archived:** Stored widgets that can be restored

**Center: Canvas (Live Preview)**

- Widgets stack vertically with drag handles
- Framer Motion `Reorder.Group` for drag-to-reorder
- Ghost placeholder on drag
- Delete: shrink + fade (300ms)
- Collapse: height animate (250ms)
- Add: slide in from bottom

**Right Panel: Properties (Contextual)**

- Common: title, border, background, padding, visibility
- Widget-specific: upload zones, grid selectors, code editors
- Rank Editor: custom rank names, colors, icons

**HTML & BBCode Reference Panel** 5 sections: HTML Tags, CSS Properties, BBCode Syntax, Animations, Color Palette

- JetBrains Mono code samples
- Click-to-copy
- Full quick-reference for profile customization

**Theme Designer Modal**

- Background: Solid | Gradient | Image | Pattern
- Content boxes: opacity, border style/color
- Typography: heading font, body font, accent color
- Live preview
- Save/Reset

---

## 13. P2P Store (/store)

**Layout: Tabbed (Browse | Your Store | Transactions)**

**Browse Tab**

- Search bar + Category dropdown + Sort dropdown
- 4-column product grid (8 mock products)
- Each product: image placeholder, title, price (in M/S/I/E), seller @handle, [Buy] button

Income-Based Service Tiers

| Annual Income | Tier     | Charge | Badge                                                                               |
|---------------|----------|--------|-------------------------------------------------------------------------------------|
| \$0-\$500     | Seedling | 2%     |  |
| \$501-\$2K    | Sprout   | 3.5%   |  |
| \$2K-\$10K    | Sapling  | 5%     |  |
| \$10K-\$50K   | Canopy   | 7%     |  |
| \$50K+        | Redwood  | 10%    |  |

Richer profiles pay higher percentage. Funds network infrastructure.

14. Settings (/settings)

9-panel control center with left navigation:

1. **Profile Faces** — 3 profile types (Public/Content/Anonymous) with visibility toggles
2. **Encryption** — E2E toggle, key fingerprint, self-destruct defaults, recovery keys
3. **Chunks & Backup** — Network health diagram, storage used, redundancy, re-seed button
4. **Friends & Circles** — Circle CRUD, drag-to-circle, mutual reveal toggle, requests
5. **Privacy** — Per-face visibility matrix, interaction settings, block list, account deletion
6. **Notifications** — Channel toggle matrix, quiet hours
7. **Appearance** — Dark/Solar Meadow/System theme, accent color, font size, motion toggle
8. **Network & P2P** — Peer status, lighthouse radius, DHT nodes, bandwidth, seeding ratio
9. **Developer** — Export data, JSON editor, cache clear, debug network map, terminal

15. XMB Rank System

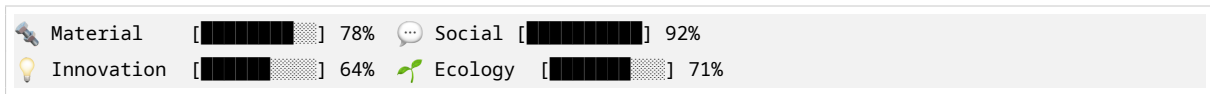

Power Hierarchy (Customizable Names)

| Code | Power              | Default     | Example Custom                                                                                      |
|------|--------------------|-------------|-----------------------------------------------------------------------------------------------------|
| SA   | Forum Owner        | Super Admin |  Grove Keeper  |
| A    | Full Moderation    | Admin       |  Branch Elder  |
| SM   | Section Moderation | Super Mod   |  Seed Guardian |
| M    | Topic Moderation   | Mod         |  Sprout Guide  |
| U    | Standard Member    | User        |  Seedling      |

- Each forum owner can rename ranks, set colors, choose icons
- Rank badges displayed everywhere: posts, friend lists, online users
- Manageable through Rank Editor in builder

## 16. Karma 4-Vector (M-S-I-E)

Displayed as 4 Reputation Bars (NOT Wallet Balances)

Dimensions:

- **Material (M)**: Hosting, bandwidth, storage contribution
- **Social (S)**: Community engagement, friendship, events
- **Innovation (I)**: Content creation, widget building, code, design
- **Ecology (E)**: Seeding, P2P uptime, helping friends backup

Rules:

- INCOMMENSURABLE — never summed to scalar
- Shown as percentile bars, not numbers
- Tooltip: “Your Material contribution exceeds 78% of peers”
- No leaderboards

Compensation (Separate, Spendable):

- Comp: 1.2K displayed in navbar
- Earned through specific labor (storage hours, bandwidth)
- Subject to demurrage (~90 day decay)
- Used for: tips, store purchases, system privileges

---

## 17. Credibility System

Formula:

- **Karma balance** (35%) — well-rounded = higher
- **Tenure** (15%) — account age + consistency
- **Post quality** (25%) — RSV peer-validated
- **Peer attestations** (25%) — RSV endorsements

Display:

- 95 (Verified) — shield + score + label
- Color: 0-25 red, 26-50 amber, 51-75 green, 76-100 emerald
- Per-forum AND per-group
- “On Willow’s Grove: 92” vs “On River’s Forum: 67”

Use:

- Governance voting weight
- Dispute resolution
- Lounge access thresholds
- Verified seller badge (requires >75)

---

## 18. Pulse Algorithm

### How It Works:

```
You post → Friends see it (Pulse = 1)
→ Friends interact
→ THEIR friends see it (Pulse = 2)
→ Those friends interact
→ THEIR friends see it (Pulse = 3)
→ STOPS. Max 3 hops.
```

**Pulse Score = hops\_traveled × interactions\_per\_hop**

- 0-10: No indicator (quiet)
- 11-50:  grey
- 51-100:  amber
- 100+:  amber + pulsing glow

### Why It's Not Addictive:

- Fixed 5 threads shown (no infinite scroll)
- No autoplay
- No AI recommendation — just pulse score + explicit tag filtering
- Explicit tag choices control what you see
- “No AI. No algorithm. Just organic propagation + your tag choices.”

---

## 19. Audience & Propagation

| Audience       | Icon                                                                                | Reach              | Propagation                        |
|----------------|-------------------------------------------------------------------------------------|--------------------|------------------------------------|
| Public         |  | Anyone             | Friends notified, free propagation |
| Friends        |  | Direct friends     | No further propagation             |
| Greater Circle |  | Friends of friends | 2-hop cascade then stops           |
| Circle         |  | Specific group     | No propagation                     |
| Anonymous      |  | No identity        | Respects audience reach            |

**Greater Circle** is the key P2P propagation layer — organic, controlled, 2-hop maximum.

---

## 20. BBCode & Rich Text

### Full BBCode Support:

```
[b]bold[/b] [i]italic[/i] [u]underline[/u] [s]strikethrough[/s]
```

```
[color=#hex]text[/color] [size=N]text[/size]
[url=https://...]link[/url] [img]url[/img]
[quote=author]text[/quote] [code]code[/code]
[center]text[/center] [spoiler]text[/spoiler]
[list][*]item[*]item[/list]
```

### Rich Text Editor Toolbar:

[B] [I] [U] [S] | [Quote] [Code] | [Link] [Image] | [Left] [Center] [Right] | [BBCode]

- WYSIWYG / BBCode toggle
- Live preview of rendered output
- Used in: thread replies, new thread composer, signatures

### BBCode Username Rendering:

- Willow: [color=#52b788][b]Willow[/b][/color]
- River: [color=#00bcd4][b]River[/b][/color]
- Jade: [color=#95d5b2][b]Jade[/b][/color]

---

## 21. Four-Currency Economy (Deprecated in v5+)

The original 🌱 Support / 😜 Prank / 🛒 Trade / ✨ Digital system was replaced in v5+ by the IVS-aligned **Karma 4-Vector (M-S-I-E)** as reputation + **Compensation** as spendable layer.

---

## 22. Forum Structure & Limits

| Feature   | Max | At Limit             |
|-----------|-----|----------------------|
| Groupings | 5   | Grey out, lock icon  |
| Topics    | 25  | “New Topic” disabled |
| Lounges   | 10  | Grey out, lock icon  |

### Hierarchy:

```
Profile (Forum)
├─ Grouping (Category)
│   └─ Topic (Sub-forum)
│       └─ Thread (Conversation)
│           └─ Post (with signature)
```

### Overflow: Archived Widgets

- Archived content doesn't display but remains in builder
- Can be restored by freeing a slot

## 23. Vblog System

- Every profile has a video blog section
  - Video cards: 16/9 thumbnail, play overlay, duration badge, title, views + age
  - Privacy: Public | Friends | Subscribers Only | Private
  - 4 mock videos on each profile
- 

## 24. Groups Widget

- **Your Groups:** Already a member, can leave
  - **Discover:** Public groups by tag, can join
  - **Create Group:** Name + description + tags + visibility
  - **Search:** Text search across group names
  - Mock: Gardeners Guild, Solar Beats, Code Forest, Digital Artists, The Council
- 

## 25. Animated Signatures

Every post shows the author's signature below a dashed separator:

### Types:

- **Marquee:** Scrolling text banner (~ □ Super Admin of Willow's Grove ~)
- **Status Pulse:** Pulsing green dot + status text
- **Stats Bar:** Posts/seeds/quality display
- **Custom HTML:** Freeform with CSS animations

### Constraints:

- Max 120px height
  - Max 3 lines text
  - CSS animations allowed: marquee, pulse, fade, slide
- 

## 26. MySpace-Style Customization

### Background Options:

- Solid color
- Gradient (2-3 color stops, direction)
- Image (upload/URL, tile/stretch/cover)
- Pattern (dots, stripes, grid)
- Animated (subtle CSS)

### Profile Layout Modes:

- **Classic:** Sidebar + main column
- **Grid:** Bento masonry

- **Wide:** Full-width stacked
- **Chaos:** Freeform absolute positioning

#### Theme Designer (in Builder):

- Background type + settings
- Content box opacity + border style
- Typography: heading font, body font, accent color
- Live preview

## 27. P2P Store & Service Charges

#### Store Features:

- Browse products by category
- Each listing: photo, title, price (M-S-I-E or Compensation), seller, [Buy]
- Escrow system: buyer pays → held in escrow → seller delivers → buyer confirms → release

#### Service Tiers (Progressive — richer pay more):

| Income      | Tier                                                                                         | Charge |
|-------------|----------------------------------------------------------------------------------------------|--------|
| \$0-\$500   |  Seedling | 2%     |
| \$501-\$2K  |  Sprout   | 3.5%   |
| \$2K-\$10K  |  Sapling  | 5%     |
| \$10K-\$50K |  Canopy   | 7%     |
| \$50K+      |  Redwood  | 10%    |

#### Dispute Resolution:

- RSV arbitration — peers with high credibility vote
- Weighted by voter credibility

## 28. Organic Reach & Connection Weight

#### How Famous Connections Work:

- Your famous friend (10K followers) interacts with your post
- THEIR 10K followers get it in their pulse queue (Pulse = 2)
- Massive organic reach without algorithms
- But: interaction from high-Social, low-Material user carries LESS weight

#### Connection Weight:

- High-credibility user interaction = 10x propagation boost
- Per-dimension: high-Social booster's like increases Social reach, not Material
- Credibility is contextual — varies by forum and group

### Dimensional Imbalance Penalty:

- S-only accumulation (fame-chasing) = lower pulse priority
  - “⚠ Dimensional imbalance detected” warning
  - Chunk service priority degrades
- 

## 29. RSV Moderation

### Recursive Signal Verification:

- All moderation decisions verified through recursive peer signals
- No central moderation team
- Peers validate content quality, dispute resolution, rank assignments
- Weighted by credibility

### Content Moderation:

- NSFW content toggleable per user
  - RSV-based flagging system
  - Forum-specific rules set by Super Admin
  - Invisible lounges for sensitive content
- 

## 30. Security & Encryption

### Visible Encryption:

- **E2E badges** on every encrypted conversation
- **Matrix rain** at 5% opacity in chat backgrounds
- **Key fingerprint drawer**: terminal-green verification
- **Self-destruct messages**: countdown → scramble → dissolve
- **Lock pulse rings**: infinite glow animation on secure content

### Encryption Options:

- End-to-end: Signal Protocol
  - Self-destruct timer: 5s, 30s, 1m, 5m, 1h
  - Persistent or ephemeral mode
  - Key storage: device-only, no server
- 

## 31. Technology Stack

| Layer         | Technology                 |
|---------------|----------------------------|
| Framework     | React 19 + TypeScript      |
| Build Tool    | Vite 7.2.4                 |
| Styling       | Tailwind CSS 3.4.19        |
| UI Components | shadcn/ui (40+ components) |

Table 10 – continued

| Layer         | Technology                 |
|---------------|----------------------------|
| Animation     | Framer Motion + GSAP       |
| Smooth Scroll | Lenis                      |
| Icons         | Lucide React               |
| Routing       | React Router (HashRouter)  |
| State         | React Context + Hooks      |
| Storage       | IndexedDB (local)          |
| P2P (Phase 2) | WebRTC Data Channels + DHT |
| Platform      | PWA (Progressive Web App)  |

## 32. File Structure

```

src/
├─ components/
│   └─ ui/           # shadcn components (40+)
│   └─ Navbar.tsx    # XMB crossbar nav (32px, VT323)
│   └─ Footer.tsx    # Network stats + manifesto
│   └─ Layout.tsx    # Page wrapper + transitions
├─ pages/
│   └─ Home.tsx      # Landing page (7 sections)
│   └─ Profile.tsx   # Forum profile (hierarchy, threads, BBCode, vblog)
│   └─ UserProfile.tsx # @username profile (6 tabs, store, karma)
│   └─ Feed.tsx      # Pulse feed (5 threads, hashtag filter)
│   └─ Explore.tsx   # Discovery (search, tags, lighthouse)
│   └─ Talk.tsx      # Encrypted messenger (E2E, self-destruct)
│   └─ Build.tsx     # Profile builder (drag-drop, theme, HTML ref)
│   └─ Store.tsx     # P2P marketplace (browse, escrow, tiers)
│   └─ Settings.tsx  # Control center (9 panels)
├─ sections/home/    # Landing page sections
├─ App.tsx           # Routes (HashRouter)
├─ main.tsx          # Entry point
├─ index.css         # Global styles + CSS tokens

## 33. Version History

| Version | Date | Key Changes                                    |
|---------|------|------------------------------------------------|
| v1      | —    | Initial scaffold, landing page                 |
| v2      | —    | Added sub-pages: feed, explore, talk, settings |

Table 11 – continued

| Version   | Date              | Key Changes                                                                                                                                           |
|-----------|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|
| v3        | —                 | Thread view with avatars, signatures, 4-currency, quality/density                                                                                     |
| v4        | —                 | Forum hierarchy: Groupings → Topics → Threads, animated signatures, audience selector                                                                 |
| v5        | —                 | Custom ranks, M-S-I-E karma, Greater Circle, pulse algorithm, hashtag filtering, groups                                                               |
| <b>v6</b> | <b>2026-05-02</b> | <b>Rich text BBCode editor, vblog, @username profiles, P2P store, credibility, MySpace backgrounds, HTML reference, theme designer, organic reach</b> |

## Core Pages Summary

| Page            | URL       | What It Does                                                                                     |
|-----------------|-----------|--------------------------------------------------------------------------------------------------|
| <b>Landing</b>  | /         | Solarpunk hero, chunk network, encryption manifesto                                              |
| <b>Forum</b>    | /:handle  | Full forum: banner, talk box, vblog, groupings→topics→threads, BBCode posts, animated signatures |
| <b>Profile</b>  | /@:handle | About, Posts, Vblog, Store, Contact, Links tabs with karma bars and credibility                  |
| <b>Feed</b>     | /feed     | 5 pulsing threads + hashtag filter, no infinite scroll                                           |
| <b>Explore</b>  | /explore  | Search, tags, random profiles, lighthouse map                                                    |
| <b>Talk</b>     | /talk     | E2E encrypted messenger with self-destruct                                                       |
| <b>Build</b>    | /build    | WYSIWYG + code builder, theme designer, HTML/BBCode reference                                    |
| <b>Store</b>    | /store    | P2P marketplace with income-based service charges                                                |
| <b>Settings</b> | /settings | 9-panel control center                                                                           |
